To Whom It May Concern:

Centerline Utilities, Inc has been performing site development construction for Kolter in the Palm Beach, Martin and St Lucie Counties area for over ten years. Most recently, Centerline successfully completed work on our Martin County located, Venetian Village, project on or around September 1<sup>st</sup> of this year. Our experience with Centerline has always been very positive. The communication between Centerline, their subcontractors, the engineer, utility inspectors and Kolter is above reproach. It is refreshing to find a contractor who is diligent in the quality of work and who sets a higher standard for others to follow; they are truly a 'team' player.

Centerline Utilities has the ability to adapt to changing field conditions and has offered, on many instances, professional comments and suggestions that have improved the quality of the finished product. Their exemplary performance in meeting Martin County's or any other Utility's expectations, as well as those of Kolter, has been influential in their services being considered for future projects. It is also reassuring to know that whether we have a small problem or an emergency situation on any of our projects, I can always reach out directly to the owners and expect a quick response to our needs.

Based on our experience with Centerline Utilities, it is our pleasure to provide this letter of recommendation and referral. We do not hesitate to recommend Centerline Utilities, Inc., for any work within their field of practice that will be challenging and demand the best of a contractor, as we are confident they will exceed all expectations.

Sincerely,

Scott G. Morton  
Director of Planning and Development
